# About

## US

We have been specialising in high **flagpoles, portable flagpoles beachflags, flags and advertising frames** for 25 years.

As an experienced **Polish manufacturer of flagpoles**, we offer a comprehensive service at every stage of implementation, from design to service and maintenance.

We create **individual projects** tailored to the needs and requirements of our customers.

We use the **highest quality materials** in production to ensure durability and reliability.

# Aluminium sectional flagpoles

## STANDARD

The flag is hoisted by a rope attached to the outside of the flagpole. The rope is tied with a sailing knot and placed approximately 1.5 m above the ground.

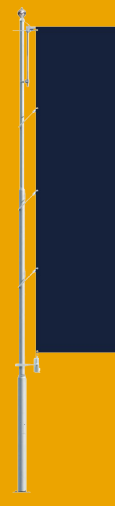

## SUPRA

The rope is located inside the mast tube to reduce noise. An internal lock with an Allen screw protects the flag against theft.

## BANER

Flagpole with a rotating socket and arm. The flag is constantly unfurled regardless of the wind. The arm is permanently attached, the mast has no rope.

## SW

The flagpole is equipped with a rope placed inside the flagpole and a hoistable horizontal arm at the top, which allows the flag to be displayed even on windless days.

**Available heights: 4 - 12 m**

# Event products

## beachflags

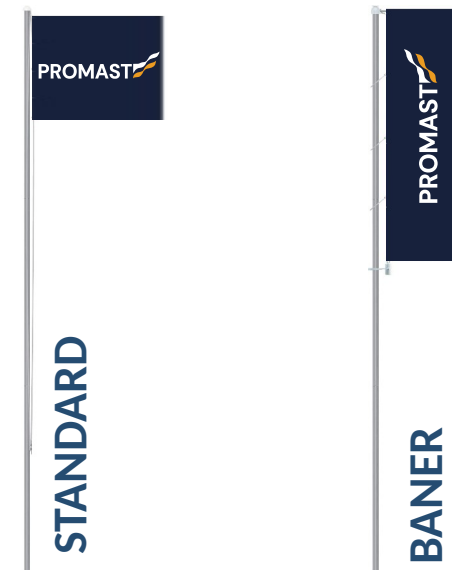

### ALUMINIUM BEACHFLAGS/WINDERS

Beachflags (winder, beach flag) are a type of mobile advertising pole used at beaches, resorts, events and festivals, and also by shops, car showrooms and restaurants. They are characterised by a unique shape resembling a tear or a feather. They are lightweight and easy to transport, making them ideal for use at events and temporary promotions.

Aluminium beachflags are available in heights of: **2.0m, 3.1m and 4.2m.**

### PORTABLE FLAGPOLES

Portable flagpoles are ideal for temporary events as they do not need to be permanently fixed to the ground. This is an extremely practical solution for event organisers who need a quick and effective way to differentiate or promote their brand at trade shows, festivals or sporting events.

Available in heights of **4, 5 and 6 metres** and in two versions: **Standard and Baner**. Manufactured from 50mm diameter aluminium tubes.

# Flagpoles accessories

All our flagpole accessories are made from high quality materials to ensure their reliability. Choose proven accessories to make your flagpole complete, aesthetic and safe.

We offer a wide range of products and professional advice to help you choose the right flagpole accessories for your individual needs.
